The free online textbook *[Data Visualisation: a Practical Introduction](#)* by Keiran Healey is a great resource on visualisation but uses the R programming language rather than Python.

There are some other good books on data visualisation are:

- *Storytelling with Data: A Data Visualization Guide for Business Professionals* by Cole Nussbaumer Knaflic
- *Fundamentals of Data Visualization: A Primer on Making Informative and Compelling Figures* by Claus O. Wilke
- *Truthful Art, The: Data, Charts, and Maps for Communication (Voices That Matter)* by Alberto Cairo
- *Data Visualization in Python with Pandas and Matplotlib* by David Landup
- *Python for Data Visualization for Beginners: Visualize Your Data using Pandas, Matplotlib and Seaborn*

It is **not** necessary to purchase any of these textbooks, they are only provided here as a reading list for interested students.
